

Participant Handbook

Hackathon ANDCS x MIT, 17-19 April 2026

Schedule	1
Resources	3
Tracks	4
Help Desk	6
Mentor Info	7
Workshops	8
Event Details	9
On-Site Logistics	11
Parking	12
Judging	13
Prizes	14

Schedule

All times below are Paris. The Hackathon will take place in EPITECH Paris, 24 Rue Pasteur in Kremlin Bicêtre.

Day	Time	Location	Event
<u>Friday</u>	5:00 PM	KB2	Welcoming desk opens
	6:00 PM	EPITA	Event kickoff - Opening presentations
	7:30 PM	EPITA	Problem pitching
	8:30 PM	Cafeteria	Dinner
	8:30 PM	Cafeteria - KB2	Team formation
	10:00 PM		End of Friday hacking
<u>Saturday</u>	9:00 AM	Cafeteria - KB2	- Breakfast - Begin hacking! - Continued team formation
	9:30 AM	KB2 Amphi	Day 2 kickoff
	10:00 AM - 12:00 PM	KB2	- Continue Hacking - Hacking workshops
	12:00 PM	Cafeteria	- Team Registration Due - Lunch
	1:00 PM	KB2	- Continue hacking - Hacking workshops - Pulse checks
	6:00 PM	KB2 - KB2 Amphi	- Continue hacking - Practice pitch

	7:30 PM	Cafeteria	Dinner
	10:00 PM		End of Saturday hacking - bar
<u>Sunday</u>	9:00 AM	Cafeteria	- Breakfast - Resume hacking
	9:30 AM	KB2 Amphi	Day 3 kickoff
	10:00 AM - 12:00 PM	KB2 - KB2 Amphi	- Continue hacking - Practice pitch
	12:00 PM	Cafeteria	- Final Presentation Due - Lunch
	1:30 PM	EPITA	Final pitch
	3:00 PM	EPITA	Closing presentations
	4:00 PM	EPITA	Awards ceremony
	5:00 PM		Hackathon ends

Workshops

Workshops will be held to guide you through the innovation process, not that the Fablab workshop is mandatory to attend for at least one member of the team if you're thinking about using 3D printers for your project.

All times below are Paris.

Day	Time	Location	Event
<u>Saturday</u>	11:00 AM	Fablab	Fablab workshop NOTE: this workshop is required for all participants who plan to take advantage of the 3D printers

	1 PM	KB2 Amphi	How to Hack workshop It is highly recommended to attend this workshop if it is your first hackathon. You will be guided through the steps of creating an innovative project, and given advice on how to build your pitch.
--	------	-----------	--

Participants are welcome and encouraged to attend all workshops. We recommend that each team sends *at least one* team member to each workshop.

Resources

Mentors: The Mentor Form will open for submitting questions on Saturday 9:00 AM via Google Forms. The mentors will be on-site on **Saturday from 11:AM to 7:00PM and on Sunday from 9:00AM to 12:00AM.**

Whatsapp Community: A Whatsapp workspace is being created where you can connect with other participants. Please find the [#travel-and-housing](#) channel to discuss accommodations, cost-sharing, airbnb sharing and other potential hosting options.

Announcements: Announcements will be made through Whatsapp and one-site during the event.

Bibliography resources: You can find on this drive bibliographic resources, that we will update when getting close to the event : [Bibliographie Track](#)

Tracks

Track 1: Environmental impact of the healthcare system

The climate emergency is one of the greatest challenges humanity must face. How can we live in a world that is +2, +3, or even +4°C warmer? How can we transform the healthcare system to ensure quality care for everyone in 50 or 100 years?

These are the questions you will explore as you propose concrete solutions to support the ecological transition of healthcare. Guided by your imagination, supported by provided academic resources, and mentored along the way, you will need to identify a future challenge and design a logistical plan and/or a technological solution to address it.

Track 2: AI in pediatrics

From early detection of rare diseases to the optimization of care pathways, artificial intelligence is opening a new era for pediatrics. However, many practical challenges remain unexplored and without solutions.

To improve the care of infants and children, you will need to work as a team to identify a specific issue in pediatrics and propose a concrete technological solution based on artificial intelligence. To achieve this, you will need to conceptualize an innovative prototype and develop a realistic implementation plan that best addresses the identified need.

Pitch Decks

After forming your team, the team leader will register your team with the track leads. The track leads will provide you with a pitch deck to give all your information around your final pitch throughout the week-end. **Please make sure all your changes are updated in these decks by the final deadline.**

Help Desk

The Help Desk will be located in the entrance of the KB2, and will be staffed for the majority of the weekend by our team. This is also where you can pick up physical resources such as whiteboards and markers. If you have any questions, come to the help desk and we will do our best to answer your questions or direct you to resources.

Mentor Info

Mentoring system

The mentoring system allows teams to submit questions, and mentors to visit teams in any track to help. This is critical for teams to receive feedback and fill knowledge gaps during the hacking process.

To submit a mentor request, please go to the **#mentor-q** channel in the whatsapp community. Click on the **[Request Mentor]** button to open the mentor request form. Give your request a title and describe it in a few words. Try to be as specific as possible in the description of your problem so that you can be matched with the optimal mentor. Submit the form.

Submitted requests will be posted in the **#mentor-q channel on Whatsapp**, and you will be able to follow the advancement of your request. Mentors will claim the ticket on the queue and drop by your team's table to work with you. We recommend that questions and interactions with mentors are limited to approximately 15 minutes for each session.

Mentor List:

We will update this document very soon with a mentor slidedeck where you can meet the mentors who will guide you through the hack.

Event Details

Problem Pitching

Problem pitching will occur on Friday night. All participants will be able to pitch on or several problems that they are interested in. This is not mandatory but we invite you to think about ideas in the tracks before you come to the event. **Each pitch will last 1 minute.**

Team Formation

Following problem pitching, participants will be given the opportunity to have discussions associated with each pitch, and will be able to **form teams of 4-6 people.**

Participants will have tags and stickers to help identify their main area of interest and the skills and domains they are proficient in. The goal will be to form **interdisciplinary teams.**

Note: You do not need to stick to the problem you pitched – you're welcome to solve another problem that was pitched or an entirely new problem altogether.

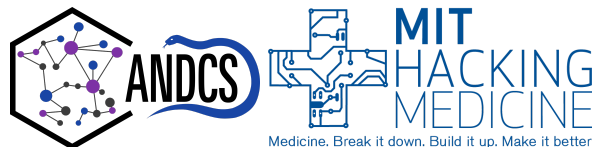

Team registration will close at **noon on Saturday**, though we highly encourage you to form teams before then!

Pulse Checks

Pulse checks will occur on Saturday afternoon, as a way for the organizing team to check in and see how teams are doing. Members of our team will come around to ask members of your team a **series of questions about your project, so be prepared to tell us about the problem you want to address.**

Prototyping

We are highly encouraging teams to produce physical prototypes of their solutions. Three 3D printers will be available in the KB2 during all the hackathon. Mentors from

EPITECH will be available throughout this period to assist teams with their prototyping efforts, providing guidance on the design and use of 3D printers.

Teams that want to engage in 3D prototyping **must have at least one member of their team attend the 3D printers presentation.**

Practice Pitches

Practice pitches will take place on **Saturday evening and Sunday morning**. On **Saturday**, teams will have **10 minutes** to meet with members of the organization and mentors to review their projects. You will have **5 minutes** to give your pitch, and our team will spend the remaining time providing feedback on areas for improvement. On **Sunday**, teams will give a **3-minute pitch**, which reflects the final presentation time. Please check the practice pitch sign-up sheet and stay tuned for announcements regarding your practice pitch location.

These spreadsheets will open at 1:00 PM on Saturday! When signing up for a slot, **please do not overwrite another team's entry**. If you are unable to make any of the slots that are remaining, please reach out to your track lead for assistance.

Final Pitches

Final pitches will occur **live** on Sunday afternoon. Teams will be given exactly 3 minutes to give their pitch using their slidedeck before moving on to a 2 minute Q&A session with the judges.

Please ensure to finish all your slides **before 12:00 PM Paris** using the **pitch deck link** corresponding to your team. **Make sure you make the changes in the provided Google Slides link, or we cannot guarantee the slides will be in the correct format for the final presentation.** The order of presentations will be **random**.

On-Site Logistics

Building

The building you will need to access is Epitech Paris, located at **24 rue Pasteur, 94270 Le Kremlin-Bicêtre**.

Judging

Pitches will be judged on the following criteria.

IMPACT	• Real problem • Potential for widespread impact • Solution addresses identified problem
INNOVATION	• Convincing rationale for why solution will work • Addresses challenges specific to stakeholders • Considers user experience, interface, and service design
BUSINESS MODEL	• Demonstrates a plan to work in the field • Sustainable business model
PRESENTATION	• Presentation effectiveness • Team (diversity backgrounds, technical expertise, etc.)

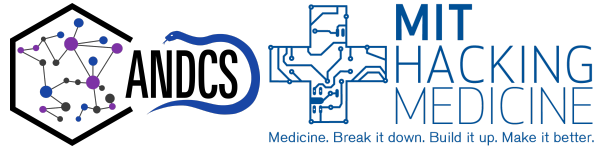

Prizes

The **top two teams** from each track will be awarded the following prizes

Track	Winner 1	Winner 2
1. AI and pediatrics	\$1000	\$1000
2. Heart Health	\$1000	\$1000

Prizes are distributed amongst members of your team. Information will be collected after the award ceremony. If you are not present, information must be submitted via email by May 6th, 2026 to receive the award.

Please be aware that in France and internationally, we might have to apply taxes on these prizes, we will come back to you on the day with more information.*

For one winning team, prizes comprises 500\$ in FNAC give card and 500\$ in nature from our sponsors :

- 2 to 3 comics from **Aapoum Bapoum**
- 2 to 3 cinema ticket from **Dulac cinéma**
(spread comics and cinema ticket within the members of the team)
- A 1 year licence for [Neophi.io](https://neophi.io) for each member

Additionally, the team that will win the **additional challenge on interoperability, rural deployment or eco-soci-healthcare aspect of their solution** will get a prize of 300€.

Thank you for your participation in the hackathon, please contact us for more questions at gestion-hackathon@andcs.org !
